

ADITYA MAHALE

AI/ML Engineer | ML Applications | Agentic Systems | Full-Stack

Pune, India | +91 97309 99186 | adityamahale76@gmail.com | [linkedin.com/in/adityam24](https://www.linkedin.com/in/adityam24) | github.com/AdityaM24

PROFESSIONAL SUMMARY

AI/ML engineer who ships things end-to-end, not just models, but the APIs, frontends, and infra around them. Built a LangGraph-based knowledge assistant used internally at a Mumbai firm, a patent-filed recommendation engine (CrayFit), and currently building a multi-site reporting platform for a live enterprise client as a freelance engineer. Comfortable moving between model work (feature engineering, training, evaluation) and product work (REST APIs, React frontends, Docker deployment), the kind of range that comes from building things solo rather than only working within one layer of a stack.

EDUCATION

MIT Academy of Engineering, Pune

2022 - 2026

B.Tech, Electronics & Telecommunication Engineering, Honours: Data Science

CGPA: 8.5 / 10.0

Relevant Coursework: Data Analytics, Machine Learning, ML Libraries, Keras, TensorFlow, PyTorch, AWS, Probability, Statistics, Data Structures & Algorithms, Linear Algebra

WORK EXPERIENCE

Software Intern, Geany Softech Pvt. Ltd. (Mumbai)

Jul 2025 - Nov 2025

- Built a LangGraph-based enterprise knowledge assistant that scraped and structured company data for natural-language retrieval, using FastAPI and LLMs.
- Improved response relevance through prompt engineering, evaluation, and context optimization for enterprise knowledge retrieval.
- Engineered FastAPI APIs and MySQL logging pipelines to track AI workflow usage, queries, and responses.
- Collaborated with engineering and business stakeholders to deliver production-ready AI solutions.

Freelance Software Engineer, Arwade Infrastructure (Pune)

May 2026 - Present

- Building a full-stack, multi-site MIS online reporting system for the EHS (Environment, Health & Safety) department, with role-based access (Safety Engineer, Safety Head, Admin) for a live enterprise client.
- Designed the core reporting flow: monthly submission with auto-escalation for pending entries, cumulative data collection across sites, and assessment/evaluation against proactive and reactive safety parameters for top management's monthly review meetings.
- Built REST APIs with a PostgreSQL/Prisma data layer; added CSV export, XLSX import, and data visualization dashboards for management reporting; wrote 96+ backend tests (Vitest, Supertest).

PROJECTS

NL2SQL - Natural Language to SQL Query Generator

Individual

Python, FastAPI, Google Gemini API, MySQL, SQL, Streamlit

- Built an AI-powered platform that converts natural language into executable SQL queries using Gemini.
- Improved SQL generation accuracy through schema-aware prompt engineering and execution safeguards.
- Built FastAPI REST APIs and a Streamlit interface for real-time query generation and execution.
- Added query validation and safety checks to prevent unsafe or malformed SQL from executing against the database.

CrayFit - AI-Powered Personalized Nutrition & Diet Recommendation Engine

Group

Python, Scikit-learn, FastAPI, React, Docker, NLP, KNN

- Built a hybrid recommendation engine combining collaborative filtering (1,000+ interactions) with content-based similarity via K-Nearest Neighbors.
- Applied StandardScaler for feature normalization across nutritional dimensions (calories, macros, micronutrients) to improve model reliability.
- Built a FastAPI inference API with a React frontend, containerized via Docker Compose for local and deployed use.
- Evaluated recommendation quality using RMSE, precision, and recall against historical user interaction data.

ACHIEVEMENTS & CERTIFICATIONS

- Patent Filed for CrayFit – AI Powered Personalized Nutrition (Feb 2025)
- Certifications: Oracle SQL (Database for Developers), AWS Certified Cloud Practitioner, Google AI/ML (AICTE EduSkills), Data Analytics Virtual Internship (Deloitte)

SKILLS

Programming & ML: Python, SQL, Scikit-learn, XGBoost, SHAP, Feature Engineering, Model Training & Evaluation

AI & LLMs: LLMs, RAG, AI Agents, Prompt Engineering, NLP, LangGraph, Google Gemini API

Backend, Frontend & Data: FastAPI, REST APIs, React, Streamlit, MySQL, PostgreSQL, Prisma, Pandas, NumPy

Cloud & Tools: AWS, Docker, Git, GitHub, Power BI, Tableau, Excel
